Subject: Invitation to the international activity:

EU-SA APP II - Air Navigation Initiative
Centralised and Regional Air Navigation Services in Europe Workshop
Sri Lanka, 29 January – 02 February 2024

The EU-SA APP II project's Air Navigation Initiative is advancing with the second regional workshop scheduled from 29 January to 02 February, 2024, in Sri Lanka. This 5-day workshop aims at covering EU ATM/ANS evolution, centralised management, interoperability, PBN implementation, civil-military coordination, and regional cooperation, fostering knowledge exchange and strategic planning for South Asia.

As a continuation of the successful workshop on Air Navigation Planning and Performance Management held in Maldives in September 2023, the workshop will seek to facilitate a holistic understanding of European practices while tailoring discussions to the specific needs and challenges of the South Asian region, thereby fostering a collaborative approach to air navigation development led by EU-SA APP II ATM/ANS experts and other EU experts.

Target participants for the workshop include members from the Civil Aviation Authorities in South Asia and relevant Air Navigation Service Providers (ANSPs).

The EU-SA APP II project will fully sponsor travel, accommodation, and meal plan for the following representatives¹:

- Two representatives from each CAA
- One representative from each ANSP per state

Additional representatives could be accepted on a case-by-case basis and upon agreement of the EU-SA APP II team. Partial sponsorship could be offered for specific cases.

Yours sincerely,

Carlos Menéndez de Solas

¹ Subject to the approval of the designated participants by the EU-SA APP II team.
